

PERMIT TO *REPAIR* A SEPTIC SYSTEM

Dear Applicant:

Attached is the application to repair an existing septic system. Please complete the appropriate sections to detail the intended work. This permit shall be used in cases of minor repairs to existing septic systems only (cracked tank, baffle replacement, cracked line, etc). In the event that more extensive work is needed on the system (replace the disposal field, etc.), a different application will be required.

A Washington Township licensed contractor must perform all work to septic systems. This department must inspect all work prior to back filling. It is the contractor's responsibility to contact us for an inspection. Please contact us 24 hours in advance of the requested inspection time.

The permit fee for a repair is \$50.00. Please allow us one week to review this application and issue this permit. Please do not hesitate to contact us at (908) 876-3650 if you have any questions regarding this permitting process.

Your anticipated cooperation is appreciated.
