Addiction is a part of many of our lives. We know that opiate addiction in general, whether it be through prescription medicine in our bathroom cabinets or through heroin use, is not only on the rise, but **soaring to epidemic proportions**. What is less known, and less admitted to, is the pervasiveness of addiction in communities that do not fit the stereotype.

We live in those communities.

Join us for a multi-week discussion on this topic and its related issues at the Community Presbyterian Church of Chester, Sunday afternoons October 1st, 8th, and 22nd from 3:30-5pm in our Fellowship Center. Bring your family, friends, and neighbors for **information, discussion, and direction.**

Due to the nature of some of the discussions, these events are suggested for those 15+ years of age.
